## SHORT BIO

I am interested in applied cryptography, mostly walking the fine line between theory and practice. In the past, I've worked on oblivious RAMs, public-key distribution, authenticated data structures, and threshold cryptography. I especially enjoy implementing and open-sourcing my work. I sometimes blog about my work and muse about other things on my website. For paper LaTeX and PDFs, slides, code artifacts and talk videos, please see `alinush.github.io/papers.html`.
